

Abdul Rehman

Technical Lead & Senior Full-Stack Engineer

+92 323 407 8721 | arehman674@gmail.com | Lahore, Pakistan | LinkedIn

PROFESSIONAL SUMMARY

Technical Lead with 8+ years of experience designing, building, and operating scalable SaaS platforms, cloud-native applications, and customer-facing products. Proven track record leading engineering initiatives, mentoring developers, optimising cloud infrastructure, and delivering business-critical software for enterprise customers including NASA, Google, Netflix, and Fortune 500 organisations. Strong background in Ruby on Rails, React, Next.js, TypeScript, PostgreSQL, AWS, and Terraform. Comfortable working across backend, frontend, cloud infrastructure, and AI-powered product features.

TECHNICAL SKILLS

Languages & Frameworks	Ruby on Rails, JavaScript, TypeScript, React.js, Next.js, Ember.js, Python, Scala (basic)
Cloud & Infrastructure	AWS (EC2, S3, Lambda, RDS, SQS, SES, Athena, CloudWatch, VPC), Terraform, Docker, Kubernetes (working knowledge), CI/CD Pipelines
Databases	PostgreSQL, MySQL, MongoDB, SQL Query Optimisation
Architecture & Engineering	REST APIs, System Design, Distributed Systems, Performance Optimisation, Production Troubleshooting, Technical Leadership, Code Reviews, Agile/Scrum
AI & Developer Tools	AI Integrations, LLM-Assisted Development Workflows, GitHub Copilot, ChatGPT

PROFESSIONAL EXPERIENCE

Technical Lead

Techieminions | February 2022 – Present

- Led architecture, development, and delivery of SaaS platforms serving enterprise customers including NASA, Google, Netflix, and Fortune 500 organisations.
- Reduced AWS infrastructure costs by 82%, cutting monthly spend from ~\$1,700 to ~\$300 while maintaining system reliability and performance.
- Designed, developed, and maintained scalable backend systems, APIs, and business-critical product features across multiple customer environments.
- Built document-processing platforms used within technical and regulatory workflows.
- Developed RubyGems and automation tooling that aggregated data from multiple sources and generated dynamic Jekyll-based platforms.
- Mentored junior engineers, conducted code reviews, established engineering standards, and improved software quality across multiple projects.
- Integrated AI-assisted workflows and product capabilities to accelerate development and streamline repetitive tasks.
- Collaborated directly with clients, product stakeholders, and engineering teams to translate business requirements into scalable technical solutions.
- Owned production systems end-to-end, troubleshooting issues across applications, databases, cloud infrastructure, and deployment environments.

Senior Software Engineer

Techieminions | February 2021 – February 2022

- Designed and developed core product functionality and APIs with a focus on security, reliability, and scalability.
- Contributed to architecture and development of a Ruby gem for geographic data integration used in Jekyll-based platforms.
- Developed a Ruby gem that automated migration from SVN repositories to Git, modernising engineering workflows.
- Managed multiple concurrent projects while consistently delivering features on schedule.
- Participated in system architecture discussions and technical decision-making across multiple client projects.

Software Engineer

7vals (AssetSonar, EZOfficeInventory, EZRentOut) | August 2018 – February 2021

- Designed and developed the AssetSonar application from the ground up using Ember.js, from initial concept through deployment and maintenance.
- Contributed to architecture and implementation of EZOfficeInventory and EZRentOut — enterprise asset management platforms used by Fortune 500 organisations worldwide.
- Led the hot-fix team responsible for resolving production issues and ensuring high availability.
- Developed reusable frontend components that improved development efficiency and consistency across multiple product lines.
- Investigated and resolved performance bottlenecks in production systems, improving application responsiveness and reliability.

EDUCATION

Bachelor of Science in Information Technology (BS IT)

Punjab University College of Information Technology (PUCIT) | 2014 – 2018

CERTIFICATIONS

IBM Data Science Specialization (Coursera)

- Machine Learning with Python
- Applied Data Science Capstone
- Data Visualization with Python
- Databases and SQL for Data Science
- Python for Data Science and AI

ADDITIONAL INFORMATION

- Experienced working with distributed teams and remote collaboration.
- Comfortable navigating unfamiliar codebases and technologies quickly.
- Currently contributing to Scala-based applications leveraging AI-assisted development workflows.
